PROJECTS:

Project: 1. Sales Business Performance Analysis

URL: **https://github.com/Dolly7678/Sales_Business_Performance_Analysis**

Tools Used: Excel, PostgreSQL, Power BI, DAX

This project focuses on analyzing sales and business performance using data analytics tools such as Excel, PostgreSQL and Power BI.

The objective of this project is to analyze sales trends, profitability, customer behavior, product performance and regional business performance to generate meaningful business insights and support data-driven decision-making.

Project: 2. Online Book store

URL: **https://github.com/Dolly7678/Online_Book-Store**

Tools Used: PostgreSQL

This project focuses on analyzing an online bookstore's sales data using PostgreSQL. The project contains three datasets: Books, Customers, and Orders. These datasets are used to analyze book sales, customer purchasing behavior, revenue performance, and inventory. The main objective is to use SQL queries to extract meaningful business insights and support data-driven decision-making.

Project: 3. Customer Shopping Behavior Analysis

URL: **https://github.com/Dolly7678/Customer_Shopping_Behavior_Analysis**

Tools Used = Python, (Pandas, Numpy), PostgreSQL, Power BI, Jupyter Notebook

This project focuses on analysing customer shopping behaviour to understand purchasing patterns, customer preferences, sales performance, and business insights. The project includes data cleaning, data analysis, SQL queries and an interactive Power BI dashboard.
